

This report is an intake, sorting, and documentation workflow summary. County-source values should be human-reviewed before being treated as verified. This is not legal advice or an inspection certification.

1. Requested Services / Report Coverage

These service areas are shown at the top of the manager report so the manager can quickly see what the report is covering.

- Pre-1978 property sorting
- Missing disclosure/documentation checklist
- Owner/company follow-up tracker
- Vendor/repair/renovation tracking

2. Summary

Item	Count	Meaning
Report type	Full property-list analyzer report	
Total rows in this report	1000	Filtered/current rows included in this manager report.
High priority	4	Rows needing first review based on age, missing data, repair/renovation notes, or conflicts.
Likely pre-1978	432	Rows old enough to require lead-safe documentation review.
Manager year missing	0	Rows where the manager input is missing year-built. County year may still be available.
Missing owner/LLC	1000	Rows where owner information needs cleanup or verification.
Documentation check needed	1000	Rows where lead-safe paperwork or notes should be reviewed.
County source matched	1000	Rows matched against one or more county source files.
Same-address / multiple owner-parcel records	102	Rows where the same address appears with different county owner or parcel records. These rows are intentionally kept because they may be useful for manager review and ownership follow-up.
Conflicts/differences	0	Rows where manager data and county-source data may differ.

3. County Sources Used

Source	County	County rows loaded	Manager rows matched	Conflicts/differences
Davidson backend county-profile processor	Davidson	1000	1000	0

Same-address rows with different county owner or parcel records are intentionally kept. Review each owner, parcel/PIN, county year, and match status before treating the group as one property.

4. Property Action List

Each property card lists the same important fields from the analyzer table, with long flags and source text wrapped instead of clipped.

6. Recommended Next Steps

Step	Action
1	Confirm missing addresses, counties, owner/LLC names, and year-built values.
2	Use county-source values to fill missing manager data only after human review.

Step	Action
3	Resolve year-built or owner conflicts before sending final findings to a customer.
4	For likely pre-1978 properties, review lead disclosure/documentation status before repair, painting, renovation, turnover, or owner follow-up.
5	Keep the source, who provided it, verification status, and follow-up notes for each item.
